```

The diagram illustrates a sequence of calls to a specific method. On the left, three white rectangular boxes are stacked vertically. Each box contains the name of a component and a method. Blue arrows originate from the right side of each of these three boxes and point towards a single, larger gray rectangular box on the right. This gray box contains the name of the target component and the specific method being called. The arrows indicate that each of the three source components is calling the target method.
