

CW.Common.CwInputManager.
Link.ClearAll< T >

CW.Common.CwInputManager.
Link.ClearAndRemove< T >

CW.Common.CwInputManager.
Link.Clear

```
graph LR; A[CW.Common.CwInputManager.Link.ClearAll< T >] --> C[CW.Common.CwInputManager.Link.Clear]; B[CW.Common.CwInputManager.Link.ClearAndRemove< T >] --> C;
```

The diagram illustrates a relationship between three methods. On the left, two white rectangular boxes represent source methods: 'CW.Common.CwInputManager.Link.ClearAll< T >' (top) and 'CW.Common.CwInputManager.Link.ClearAndRemove< T >' (bottom). On the right, a gray rectangular box represents a target method: 'CW.Common.CwInputManager.Link.Clear'. Two blue arrows point from the right side of each source box to the left side of the target box, indicating that both 'ClearAll' and 'ClearAndRemove' methods delegate or call the 'Clear' method.
