

Spine.ExposedList.Convert
All< TOutput >

Spine.ExposedList.GetRange

Spine.ExposedList.ExposedList

```
graph LR; A[Spine.ExposedList.Convert<br/>All< TOutput >] --> C[Spine.ExposedList.ExposedList]; B[Spine.ExposedList.GetRange] --> C;
```

The diagram illustrates a relationship between two methods and a class. On the left, there are two white rectangular boxes. The top box contains the text 'Spine.ExposedList.Convert' followed by 'All< TOutput >' on the next line. The bottom box contains the text 'Spine.ExposedList.GetRange'. On the right, there is a gray rectangular box containing the text 'Spine.ExposedList.ExposedList'. Two blue arrows point from the right side of the top white box and the right side of the bottom white box to the left side of the gray box, indicating that both methods are associated with or point to the 'ExposedList' class.
